
Quality and environment

Sustainability

We are committed to minimizing the use of materials harmful to the environment.

For Sirico, environmental responsibility is an integral part of our operations, management, and decision-making, through which we strive to minimize our environmental impact.

We also aim to continuously develop our business to prevent and reduce emissions and waste generated by our activities.

Our products comply with lead-free soldering processes regarding both materials and final coatings.

REACH Regulation

We operate in accordance with the **EU REACH Regulation** (Registration, Evaluation, Authorization and Restriction of Chemicals), which entered into force on June 1, 2007.

Further information on the **REACH Regulation** can be found on the [European Chemicals Agency \(ECHA\) website](#).

RoHS directive

The Restriction of Hazardous Substances (RoHS) is an EU directive (2011/65/EU) that restricts the use of certain hazardous substances in electrical and electronic equipment. At Sirico, we constantly monitor and incorporate new regulations added to the **EU RoHS directive**.

Further information on the **RoHS directive** can be found on the [European Commission website](#).

Products manufactured by **Sirico** are always compliant with the **RoHS directive**.

We can provide our customers with documentation for finished products in accordance with both **RoHS and REACH regulations**.

Conflict Minerals

We are aware of and comply with the regulations regarding **Conflict Minerals (Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502)**.

Conflict Minerals include the following minerals sourced from the Democratic Republic of the Congo (DRC) and its adjoining countries: cassiterite (tin, SnO₂), columbite-tantalite (coltan/tantalum), wolframite (tungsten), and gold (Au).
