

Sirico Electronics' environmental policy is based on responsibility, continuous improvement, and the sustainable use of resources. Our objective is to reduce environmental impacts, comply with legal obligations, and promote environmental responsibility as part of our daily operations.

- **Environmental Responsibility**
We identify and manage the most significant environmental aspects of our operations and proactively prevent adverse impacts.
- **Compliance with Legislation and Requirements**
We operate in accordance with applicable environmental legislation, regulatory requirements, and stakeholder expectations.
- **Sustainable Use of Natural Resources and Circular Economy Principles**
We improve material efficiency, waste sorting, and recycling, while promoting reuse and environmentally friendly solutions whenever possible.
- **Responsible Collaboration**
We collaborate with customers and suppliers to increase awareness of environmental responsibility and to support sustainable solutions.
- **Employee Engagement**
We train and guide our personnel to act in an environmentally responsible manner and to promote sustainable practices in their daily work.
- **Continuous Improvement**
We identify areas for improvement, set measurable targets, and regularly monitor progress to continuously develop our environmental performance.
